Special issue

“Sustainable Development and Environmental Safety”

Submission deadline: November 1, 2022

We invite you to submit manuscripts presenting your achievements in fundamental and applied research of environmental safety and sustainable development. The theme of the issue covers a wide range of questions, including the analysis of environmental technologies and criteria for sustainable development of industrial agglomerations.

The issue invites original research articles in the following fields:

- Monitoring and assessment of the technogenic impact of production facilities on the natural environment
- Sustainable development of regions and industrial agglomerations, rational use and protection of natural resources
- Assessment and management of environmental safety in the functioning of production facilities in the mineral resource complex
- Solid waste management and reclamation of disturbed lands
- Novel off-gas cleaning methods
- Innovative wastewater treatment techniques
- Modern methods of restoration and phytoremediation of polluted areas
- Innovative recycling of production and consumption waste

All articles are indexed by international databases, including Scopus (Q1) and Web of Science.

Responsible editors of the issue: Professor M.A.Pashkevich, Dr. of Engineering, Head of the Department of Geocology; A.S.Danilov, Candidate of Engineering Sciences, Senior Lecturer of the Department of Geocology.

Articles must be submitted according to the rules of the Journal of Mining Institute.

Manuscripts are accepted only through the article submission system on the journal website pmi.spmi.ru.

Publication: February 2023.
