e-ISSN 2541-9404

Dear colleagues!
We invite you to publish in a thematic volume
*«Environmental safety and sustainable development:
recycling of mining waste and restoration of disturbed lands»*

Submission deadline: April 10, 2026

The issue covers a wide range of research topics devoted to modern technologies for integrating waste into the production of secondary resources and the restoration of the areas disturbed by economic activity.

The journal accepts original research articles in the following areas:

- Use of waste from mineral extraction and processing plants in wastewater and exhaust gas treatment
- Involvement of waste in the remediation of disturbed lands
- Use of waste from mineral extraction and processing plants in the construction industry
- Other uses of waste from mineral extraction and processing plants
- Life cycle assessment of products derived from waste from mineral extraction and processing plants
- New approaches to restoring areas disturbed by mining activities
- Modeling pollutant migration in natural and technical systems during restoration of disturbed lands

All the articles are indexed in international databases, including Scopus and Web of Science.

Journal Ranking: Scopus – Q1, CiteScore – 8.8.

Web of Science Core Collection (ESCI) – JCR Q1. Journal Impact Factor 2.9 (2024).

More about the [ranking](#)

Requirements for the articles:

formatting should comply with the [guidelines](#) of the “Journal of Mining Institute”; submission should be made only through the article submission system on the journal website pmi.spmi.ru (section: Thematic volume: Waste management).

Publishing Editors:

Aleksandr S. Danilov, Candidate of Engineering Sciences, Associate Professor of Department of Geoecology, CEnv,

Vera A. Matveeva, Candidate of Engineering Sciences, Director of Scientific Center “Assessment of antropogenic transformation of ecosystems”.

Publication: October 2026
